

GARNET Filtration Media

Garnet is a chemically inert non-metallic mineral commonly found in the natural environment. It is hard, durable, has a high specific gravity, and is resistant to loss by attrition. All of these characteristics make it an effective filtration medium, with long life and low maintenance requirement.

Color: reddish black

Specific Gravity: >4.0

Acid Solubility: <1.0

Hardness: 7.5 – 8.0 on MOH scale

Density: 120 - 151 lbs/ft³

Size: 0.15 – 2.45 mm

UC (D 60): 1.4 - <1.8

ANSI/NSF 61 Approved

AWWA Standard B100-01
