

ABRASIVE SAND Filtration Media

Abrasive sand is a washed, dried, and closely graded product. Because of the unique shape, and the chemical makeup of the sand, it offers the qualities necessary for superior abrasive profiles. Abrasive sand is particularly applicable for the removal of heavy rust, epoxy paints, concrete, mill scale rust and paint from steel surfaces of structural members and gauge materials.

Color: light brown to multi colored

Hardness: 7 - 8 on MOH scale

Density: 100 lbs/ft³

Size: fine 0.20 mm to Magnum 1.00 mm

ANSI/NSF 61 Approved

AWWA Standard B100-01

Abrasive sand comes in fine, regular, heavy, and magnum grades.
